

## SYSTEM FOR SAMPLING VZ-01

NSN 6665-420000602

With NBC sampling system, it is possible to take solid and liquid samples. NBC sampling system is automated. Operator from inside the vehicle controls the sampling arm.

Samples are stored in the cartridge, ready for transport to the specialized laboratory. Cartridges are stored in the loader. Before taking a sample, NBC sampling system automatically opens a cartridge, takes a sample and close a cartridge. With software and GPS support NBC sampling system memorize location of every taken sample. It is possible to take up to 8 samples without changing cartridges. NBC sampling system use power supply 24V DC, pneumatic and hydraulic. Time of taking sample is less than 2 min.
